

Proposal for Recruitment Module Implementation

June 16, 2025

KEY OBJECTIVES

Transforming Hiring into a Structured, Scalable, and Efficient Process

1

Streamline and Structure the Hiring Process

- Replace unstructured hiring workflows with a standardized platform
- Manage requisition creation, approvals, candidate tracking, and offer roll-out in a single system
- Enable traceability and transparency across all recruitment stages

2

Implement Multi-Level Approval Workflows

- Configure custom approval hierarchies for requisitions and offer releases
- Enable escalation matrix for delayed approvals to prevent bottlenecks
- Ensure compliance and control with full audit trail of each approval step

3

Provide 15 Dedicated Recruiter Logins

- Offer role-based access to recruiters to manage specific departments or plants
- Each recruiter will get a personalized dashboard to track open positions, candidate progress, and pending actions
- Enhanced recruiter coordination and accountability through shared visibility

4

Reduce Time-to-Hire for 500+ Monthly Joinees

- Automate manual steps such as resume screening, interview scheduling, and communication
- Use predefined offer templates and salary structures to quickly issue compliant offers
- Reduce dependency on email chains, Excel files, and offline approvals

5

Integrate Seamlessly with HRMS & Payroll

- Ensure that selected candidates move directly into the employee onboarding module
- Avoid duplicate data entry and manual effort
- Enable one-click conversion from candidate to employee record

6

Enable Data-Driven Recruitment Decisions

- Access built-in dashboards on recruiter performance, source effectiveness, and vacancy aging
- Download reports on TAT, rejection reasons, and offer dropouts
- Drive hiring strategy with real-time insights and benchmarking

CHALLENGES IDENTIFIED

Current Gaps in Recruitment Operations at Rashmi Metaliks

No Centralized Recruitment System

- Recruitment is managed through fragmented tools such as Excel, emails, and phone calls.
- No visibility into the status of open positions or candidate progress.
- Difficult to audit or generate hiring-related MIS reports.

Lack of Automated Approval Flows

- Current approval processes for requisitions and offer letters are offline/manual.
- Multi-level approvals result in communication gaps and extended cycle times.
- Delayed offer rollouts lead to candidate dropouts and reduced joining ratios.

Limited Offer Letter Controls and Tracking

- Offers are manually drafted, increasing the risk of errors and inconsistencies.
- No system-driven validation of compensation, designations, or joining conditions.
- Difficult to track offers accepted, declined, or withdrawn.

06

05

04

03

02

01

Unstructured and Inconsistent Hiring Workflow

- No uniform method for raising job requisitions or tracking approvals.
- Dependency on HR personnel to follow up manually across departments.
- Higher risk of missed follow-ups and hiring delays.

Inability to Support Recruiter Collaboration

- Recruiters have no shared platform for managing roles, interviews, and feedback.
- No recruiter-wise allocation of tasks or performance tracking.
- Increasing hiring volume is difficult to scale under the current setup.

No Analytics or Hiring Insights

- Offers are manually drafted, increasing the risk of errors and Inability to measure hiring efficiency, source performance, or recruitment bottlenecks.
- Manual MIS preparation adds to HR workload and often lacks real-time accuracy.

RECRUITMENT MODULE OVERVIEW

A Centralized, Scalable, and Intelligent Hiring Platform

Applicant Tracking System (ATS)

- Central platform for capturing, screening, and progressing candidates.
- Pipeline views of each role: applied, screened, interviewed, selected, rejected.
- Resume parsing and tagging for faster filtering.

Offer Letter Automation

- System-generated offer letters using approved templates.
- Auto-validation of salary structure, benefits, and designations.
- E-signature enablement and offer tracking (issued, accepted, declined).

Analytics & Dashboard Reporting

- TAT (turnaround time) reports by recruiter, department, and location.
- Source effectiveness metrics (consultant, referral, direct).
- Vacancy aging reports and offer-to-join conversion tracking.

Job Requisition Management

- Digitized requisition creation linked with defined department, location, and role.
- Built-in multi-level approval workflows with escalation triggers.
- Role-based permissions to raise, approve, and monitor requisitions.

15 Recruiter Logins with Role-Based Access

- Dedicated dashboards for each recruiter.
- Visibility into assigned requisitions, candidate pipeline, and pending actions.
- Configurable recruiter access by plant, region, or department.

Approval Hierarchies & Governance

- Dynamic workflow setup for requisition and offer approvals.
- Real-time status visibility for each stage.
- Audit trail of who approved what and when.

Seamless HRMS & Payroll Integration

- One-click conversion of selected candidates to employees.
- Sync of personal, job, and compensation data into the onboarding module.
- Ensures compliance and reduces rework.

IMPLEMENTATION PLAN

Protiviti proposes a structured 4-week implementation plan to deploy the Recruitment Module at Rashmi Metaliks. The approach includes planning, system setup, user training, and post-go-live support to ensure smooth adoption and minimal disruption.

STAKEHOLDER ROLES & RESPONSIBILITIES

BENEFITS TO RASHMI GROUP

DRIVING HIRING EXCELLENCE THROUGH STRUCTURE, SPEED, AND SCALABILITY

The Recruitment Module is designed to not only digitize recruitment at Rashmi Metaliks but to transform it into a high-performing, insight-driven function that aligns with the organization's growth and compliance needs.

COMMERCIAL MODEL & ASSUMPTIONS

TRANSPARENT PRICING BACKED BY SCALABLE VALUE

The commercial structure for the Recruitment Module is designed to support Rashmi Metaliks scale of operations, high hiring volume, and need for multiple recruiter logins while ensuring predictable cost and measurable ROI.

COMPONENT	DETAILS	MONTHLY FEE (INR)
		COMMERCIALS
Recruitment Module License	Core module access with 15 recruiter logins	INR 1900 (Per Login Per Month)
Implementation & Configuration	One-time setup, workflow design, recruiter onboarding	INR 50000
Training & UAT Support	Training sessions for HR, recruiters, hiring managers	Included
Post-Go-Live Support (First 2 months)	Priority helpdesk and weekly check-ins	Included
Additional Recruiter Logins (if required)	Beyond 15 logins	INR 1800 (Per Login Per Month)

Key Assumptions

- Rashmi Metaliks will nominate SPOCs from HR, IT (if applicable), and plant heads during implementation
- All recruiter names and login email IDs to be shared at project start
- Approval flows and salary structures will be finalized before configuration begins
- Offer letter templates and requisition formats will be provided by the HR team
- Any custom integration with third-party systems (e.g., SAP, payroll) will be scoped separately

Optional Add-Ons (Available on Request)

- Career page integration with company website
- Background verification initiation from within the platform

Face the Future with Confidence®
